

OUR MISSION

We at Radiology Associates of Ocala, P.A. are committed to providing our patients with high quality imaging services using state-of-the-art technology in a caring, comfortable and professional setting.

Above all, our team of Board Certified radiologists and experienced, qualified professional staff are focused on meeting the needs of our patients, referring physicians and community.

Our Team of Board Certified, Sub-specialized Radiologists and Providers

A Difference You Can Feel Good About

Radiology Associates of Ocala's over 45 years serving Marion County and the surrounding areas have made us a trusted name in quality medical imaging. As Marion County's only full-service imaging provider, we combine unparalleled experience with the latest technology, creating an environment of trust you will feel from the moment you arrive.

We cater to patients of all ages and our four affiliated outpatient facilities are designed to provide a full range of technologically advanced outpatient services in a secure, comfortable environment. We feature high-resolution PET/CT, 3D mammography, stereotactic breast biopsy, breast MRI and other leading-edge procedures.

We also offer pain injections, stents, and treatments for leg veins, back pain, and more at the region's most respected hospitals.

RAO's radiologists are the exclusive providers of imaging and interventional radiology services and more at AdventHealth Ocala, Ocala Regional Medical Center, West Marion Community Hospital and Bravera Health Seven Rivers in Citrus County.

Additionally, both our Women's Imaging Center and TimberRidge Imaging Center have received the designation of Breast Imaging Center of Excellence by the American College of Radiology, an honor given to only a select few of Florida's breast imaging centers. This means they meet nationally accepted standards of care in all ACR-accredited breast imaging modalities.
